

Prithwinraj R M

LLM Engineer — AI — Developer — DevOps

+919566009508 | rmprithwinraj@gmail.com | linkedin.com/in/prithwin-raj-r-m | prithwin-porf.vercel.app

OBJECTIVE

Motivated **tech enthusiast** with experience in **AI, LLMs** (OpenAI, Claude), **cloud computing**, **network security**, and **IoT**. Proficient in **AWS, Azure** and **Linux**, with foundations in **prompt engineering**, **cloud infrastructure**, and **DevOps**. Known for rapid learning and emerging leadership, with a track record of delivering **industry-focused solutions** using modern AI and cloud tools, I aim to build **intelligent systems** that create impactful, real-world outcomes.

EXPERIENCE

AI Software Developer Intern → Full-Time

Feb 2026 – Present

DOTRYDER

Hybrid – Pune, Bangalore

- Built a **speech-to-speech RAG chatbot** as a product using **LLMs**, supporting both **English and Hindi**, and presented the solution at the **Bharat Electric Summit**.
- Completed an on-site **PPE detection and safety alert POC** for **NTPC Lara** using a **vision AI model**, deployed it on the client server, and presented the solution to stakeholders.

AI Software Developer Intern - Paid

Jan 2026 – Jun 2026

MOBIUS – XTRACT.IO

Chennai, India

- Set up an **OpenClaw** workflow on **EC2** and built a **Telegram financial report bot** that parses uploaded **XLS and PDF** files using **OpenAI**, then sends structured reports automatically.
- Developed a **self-training time card extraction pipeline** inspired by **Karpathy-style iterative prompting**, improving prompt quality for the **xDAS** platform through repeated refinement.
- Created a **graph RAG system** in **Neo4j** for PDF Q&A, extended it to **lease documents**, and built a **Tata Motors POC** that scrapes and displays automotive news relevant to business activities.
- Implemented **maritime bounding-box detection** for sea safety use cases and contributed to multiple AI automation and document intelligence workflows.

Software Engineer Intern (AI & Cloud Automation) – Paid

May 2025 – August 2025

Neeve.ai (IoTium) – AI & Edge Cloud Infrastructure

Chennai, India

- Worked on the **Secure Edge** platform by automating backend and deployment processes using **Python, REST APIs**, for reverse proxy. Gained hands-on experience with **AWS VPCs, route tables, CIDR-based routing**, and subnet-level traffic flow management in modular OT systems.
- Developed the **MCP (Model Context Protocol - Playwright and sequential thinking)** an internal automation framework enabling support teams to resolve remote-access issues without developer intervention. Uses sequential logic for debugging workflows, integrates Playwright for web analysis/client simulation, and suggests fixes via VS Code Copilot streamlined resolutions for 10+ recurring issues weekly

Project Intern (Mentored)

Jan 2025 – Mar 2025

WORLDLINE – Financial Services Company

Remote – Chennai

- Engineered a real-time **Credit Card Fraud Detection** system leveraging **XGBoost**, enhanced with **SMOTE** to address class imbalance and optimized through **RandomizedSearchCV** for superior predictive accuracy.
- Developed and deployed a live transaction simulation pipeline using **Flask** and **MQTT protocol**, enabling low-latency data streaming to a fraud classification engine and designed an interactive, real-time monitoring interface using **Streamlit**, incorporating advanced visualizations .

Network Engineer Intern

May 2024 – July 2024

GREENWARE TECHNOLOGIES - Data Scouts & Guards

Remote – UAE, Trichy

- Gained hands-on experience in **AD & server Management, PAM solutions, project management, customer handling, networking (Windows Server 19 and firewall), CyberArk, and RedHat**.
- Managed and executed onsite projects, collaborated with diverse teams, and improved problem-solving skills.

TECHNICAL SKILLS

- Languages & Databases:** Python, C, MySQL, PostgreSQL, SQLite
- Cloud & DevOps:** AWS (EC2, VPC, Route Tables), Azure (IoT Hub, DPS, Stream Analytics, Storage, Databricks, Web Services, Bastion, Firewall, DNAT), Git, GitHub, Bitbucket, Docker, Postman, Virtual Machines, Linux, API Development, IaaS, PaaS, SaaS
- Web & Visualization:** Streamlit, Plotly, HTML5, CSS, Node.js, React.js, Power BI, Tableau
- AI & LLMs:** OpenAI, Claude, Prompt Engineering, Retrieval-Augmented Generation (RAG), Vision AI
- Other Tools:** Adobe Premiere Pro, Davinci resolve Studio (Editing), Azure PowerShell, MQTT Protocol, Flask

PROJECTS

DCRNN-Based Groundwater Quality Prediction using Copernicus Land Use and Hydro Indices 2026

- Developed a graph-based **DCRNN** model to predict groundwater quality indicators for Perambalur District using **Copernicus land-use TIFF data**, hydro-geochemical indices, and multi-year well observations.
- Engineered input features from raster and tabular sources, including land-use classification, ionic ratios, seasonal encodings, and elevation-based attributes, to improve prediction performance across multiple water quality targets.
- Generated well-wise forecasts for **WQI, Na, PI, SAR, and MHR** for future periods and organized outputs by land-use group for comparative analysis and reporting.

Spotify Business Insights with LLM 2025

- Leveraging **LLMs (GPT-4, BERT)** and **ML models (Facebook Prophet, LSTM)** to analyze Spotify data for music trend predictions. Utilizing **Spotipy, Pandas, VADER** for sentiment analysis and **Streamlit, Plotly** for interactive visualizations.

Credit Card Fraud Detection System 2025

- Developed under mentorship from **Worldline**, this real-time fraud detection system uses **XGBoost, SMOTE**, and **RandomizedSearchCV**, integrated with **MQTT** for streaming and **Flask** for simulation. Built an interactive **Streamlit dashboard** and employed **Scikit-learn, Pandas**, and **Matplotlib** for feature engineering and visualization.

Anniversary Website 2025

- Designed and developed a full-fledged front-end website for a 1st-year anniversary event using **React.js** for the UI and **Node.js** for the backend. The website featured interactive elements, event details, and a dynamic RSVP system.

End-to-End IoT Solution for High-Velocity Smart Meter Data Analysis in Azure 2024

- Developed a lambda architecture to process high-velocity smart meter data in real-time using **Azure IoT Hub, DPS**, and **Stream Analytics**. Implemented long-term data storage with **Azure Storage** and advanced analytics through **Azure Databricks**, enabling insights and visualization for data-driven decision-making.

Build a Computer Vision App with Azure Cognitive Services 2024

- Created a computer vision application using **Azure Cognitive Services** to analyze images and extract meaningful insights. Utilized API variations to optimize performance and integrated the model into a scalable web application.

EDUCATION

Bachelors of Technology in Computer Science Engineering (IoT)	2022 – 2026
<i>Shiv Nadar University, Chennai</i>	<i>CGPA: 7.4/10 (current)</i>
Senior Secondary (12th Grade)	2020 – 2021
<i>DAV Public School, Chennai</i>	<i>Percentage: 80%</i>
Secondary (10th Grade)	2018 – 2019
<i>DAV Public School, Chennai</i>	<i>Percentage: 92%</i>

CERTIFICATIONS AND ACHIEVEMENTS

Claude 101 – Anthropic Academy (Jun 2026) Verified Credential: https://verify.skilljar.com/c/3xduawc6psvv
AI Fluency: AI Capabilities & Limitations – Anthropic Academy (Jun 2026) Verified Credential: https://verify.skilljar.com/c/pjcc4n5s3ijk
AI Fluency: Framework & Foundations – Anthropic Academy (Jun 2026) Verified Credential: https://verify.skilljar.com/c/xs3ecfuin6wh
Build a Computer Vision App with Azure Cognitive Services – Microsoft, Coursera (Oct 2024) Verified Credential: https://coursera.org/verify/JHQWA1137C29
International Astronomical Search Collaboration (Asteroid Discovery) – Certificate of Recognition

EXTRACURRICULAR ACTIVITIES

Mixed Martial Arts (MMA) (2024 – Current) – National-level athlete actively training across Boxing, Wrestling, Jiu-Jitsu, Judo , and Muay Thai , focusing on discipline, mental strength, and overall well-being.
Filmmaking & Content Creation (2023 – Current) – Served as Film Club Head at college, leading short film projects end-to-end. Write and sell scripts, direct and produce short films, and handle videography, editing , and post-production . Manage part-time social media content for brands, improving engagement through storytelling and visual design.
